

e-Media is committed to customer satisfaction. As a client you receive a dedicated Client Services Manager, who works with you to understand your business needs and is available to help make strategic and technical decisions about your integrated streaming solutions.

Customer Support is available 24/7 to facilitate requests, answer questions and help your product launch succeed.

PRODUCT LAUNCH

Speed a product or service to market

e-Media's clients use streaming media to market their products and services to their target customers. Using our solutions, businesses are able to communicate a visually impactful message to their constituents on a continual basis. Streaming media can decrease time to market and allow for up-to-the-minute changes in product information while saving on travel expenses and production costs.

e-Media provides you with a complete end-to-end solution, from the live event production to on-demand streaming and integrated hosting services. e-Media also has many individual options and combinations of Integrated Streaming Solutions that can be tailored to meet your product launch needs.

Our applications help increase the effectiveness of your message with features such as: closed captioning, polling, question submittal and chat allowing your audience to participate in real time. e-Media's security options including stream authentication and registration-required events allow you to verify audience attendance while keeping sensitive content secure. Our ability to deliver live or on-demand audio/video, with a slide presentation, WebPages or downloadable files make e-Media the smart choice for your business communication solutions.

e-Media's customer-centric culture and superior service led to the development of the e-Media Client ConsoleSM, a comprehensive suite of powerful media management tools, designed to allow our clients to manage, control and analyze their content. The e-Media Client Console also includes an extensive statistical reporting package that enables our clients to obtain and view customized information including content popularity and up-to-the-minute usage reports.
